

8-BIT SUBTRACTION

EXP NO: 2

AIM: To write an assembly language program to implement 8-bit subtraction using 8085 processor.

ALGORITHM:

- 1) Start the program by loading the first data into the accumulator.
- 2) Move the data to a register.
- 3) Get the second data and load it into the accumulator.
- 4) Subtract the two register contents.
- 5) Check for borrow.
- 6) Store the difference and borrow in the memory location.
- 7) Halt.

PROGRAM:

LDA 8000

MOV B, A

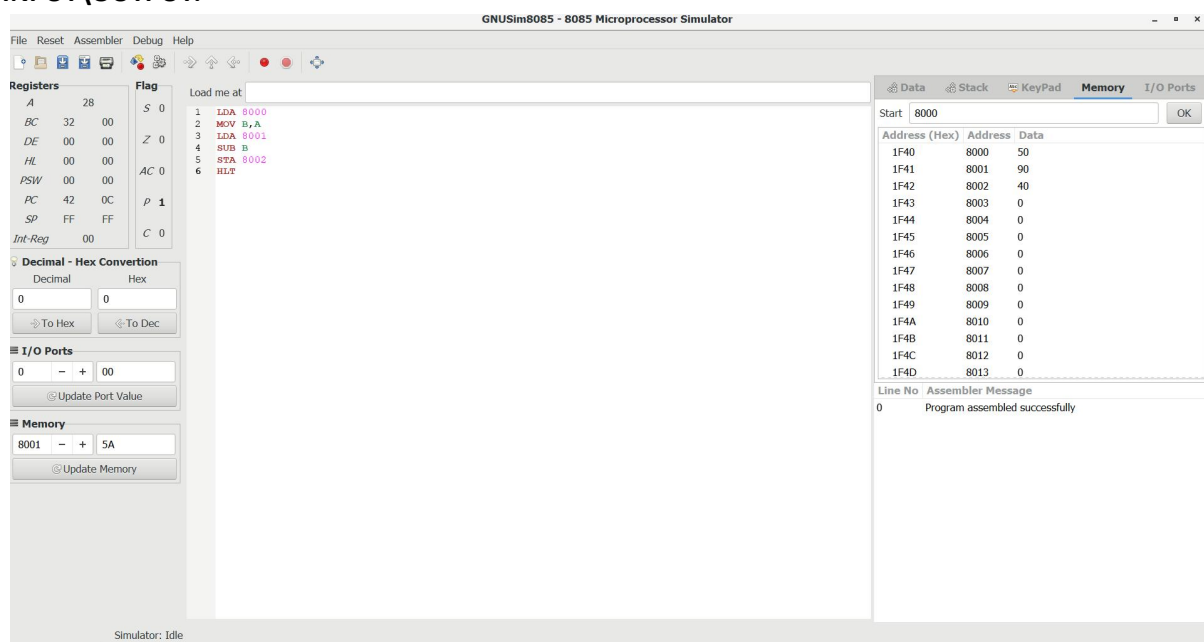

LDA 8001

SUB B

STA 8002

RST 1

INPUT\OUTPUT:

RESULT: Thus the program was executed successfully using 8085 processor simulator.
